

## **PHI315 Final Details + Donnie Darko**

Okay, today is our last class. I want to give you details about your final, and then talk about donnie darko the film.

Let us talk about your final first.

Syllabus says this:

Paper IV: The fourth paper is like your third paper, and in turn the second paper. The only difference is that I expect to also see an additional page of an overall reflection on your growth and experience in the course. Your paper will be on the last content in the class, namely on how science fiction opens the horizon of possibility when it comes to our own interpretation of our existence. (18% of your final grade, due 3pm Wednesday, December 13).

Basically, do what you did for the last paper but: (1) it is on existentialism now and the related movies, (2) add a page reflecting on your growth and experience in the class—how you have changed, what has changed, related to this class, I want a growth statement if that makes sense. I want 2000 words for the final. If you are lacking stuff to say, reference other movies for additional connections. Remember that you gotta talk about things other students said in the class too.

Ok, let that sink in, and then ask me questions. Then we can discuss donnie darko.
